OFFICINA
NICOLAZZI
DAL 1960

Abbiamo una sola vita e un solo pianeta.

Conviene prendersene cura. È importante circondarsi di bellezza e produrre bellezza, salvaguardando la natura.

Noi lo facciamo da sempre e per questo siamo in regola con molte certificazioni internazionali, tra le quali la più restrittiva a livello mondiale: la certificazione per gli USA e la California, che pretendono prodotti completamente atossici. L'ottone che amiamo e utilizziamo è senza piombo. I nostri rubinetti non rilasciano nichel e zinco nell'acqua che bevi. Amiamo la Natura e la Bellezza. Come i nostri Clienti.

We only have one life, and one planet.

We better take care of it. It is important to surround yourself with beauty and to produce beauty, protecting nature.

We have always done it, and that's why we have loads of international certifications, including the most restrictive one in the world: the USA and California certification, which demands completely non-toxic products. The brass we love and use is lead-free. Our faucets do not release nickel and zinc in the water you drink. We love Nature and Beauty. Like our Clients.

Il fondatore Bruno Nicolazzi *The founder Bruno Nicolazzi*

Dal 1960

OFFICINA NICOLAZZI

"Sai quando una cosa è fatta bene? E' qualcosa che hai pensato, che hai progettato, che hai forgiato e costruito tutta qui, sotto i tuoi occhi. Sono oggetti che non si curano delle mode, che non cambiano cento volte, che durano cent'anni".

Questo è il pensiero imprenditoriale di Bruno Nicolazzi, un uomo che ha fondato e guidato la sua rubinetteria dal 1960. Basta avere l'occasione di guardarlo negli occhi per capire la serietà e l'amore che mette nel suo lavoro. Si può diventare "grandi" per caso ma non lo si rimane senza vero talento ed impegno. Officina Nicolazzi ha ottenuto le certificazioni internazionali per USA, Canada, California, Australia, Nuova Zelanda e Belgio, le quali esigono prodotti completamente atossici. Le collezioni della rubinetteria Nicolazzi spaziano dalle linee classiche a quelle più moderne, filo conduttore la grande cura dei materiali e della qualità. Insieme ai tradizionali materiali della rubinetteria ne troviamo altri decisamente meno usuali come l'onice, il cristallo e le pietre. Colori inattesi e materiali ricchi di valore intrinseco si sposano al metallo per vestire il flusso dell'acqua di fascino da sogno.

Since 1960

OFFICINA NICOLAZZI

"Do you know when something is properly made? It's something you thought about and designed, something you shaped and built here, directly under your eyes. These are objects which don't care about fashion, which don't change a hundred times and they last for a hundred years".

This is Bruno Nicolazzi's way of thinking, a man who has started, and has been leading his taps and fittings company since 1960. You just have to look at him in his eyes to understand the commitment and love he puts in his work. You can become great by chance but you can not remain great without talent and hard work. Officina Nicolazzi has obtained the international certifications for USA, Canada, California, New Zeland and Belgium, countries where non-toxic products are strictly required. Nicolazzi taps collection ranges from the classic to the modern lines, paying great attention to details and quality. In addition to the traditional materials, you can find more particular ones, like onyx, crystal and other stones. Unexpected colors and valuable materials merge with the metal, turning water flow into a dreamy charm.
